We have had a wonderful experience so far at Oakland Steiner School and are very pleased to have discovered this education opportunity. Our son began in Parent/Child classes and is now in third grade. He has a strong foundation of numerous skills which began in the Children's Center. He has an astounding willingness to learn which we credit to his dedicated teachers. Our daughter, currently in the Children's Center, couldn't wait to start school after watching her brother's journey. She is happy and flourishing, taking in the many beautiful gifts and experiences given to her in this loving and peaceful environment. Our children are joyfully thriving and are growing up truly learning with eagerness. We are impressed with the thoroughness of the curriculum and the deeper learning the children experience which they will carry with them all their lives. We wish every child could go through this Waldorf education, it is truly amazing!

Our children first experienced OSS in the Parent/Child class. That was our introduction to Waldorf education. We immediately knew in our hearts that OSS was the right place for our children. They thrive because the Children's Center is an abundantly nurturing and organic environment. The teachers truly care about the children and have been of great support to our family. As we enrolled, we wanted to learn more about the Waldorf curriculum and began taking classes at the Waldorf Institute of Southeastern Michigan and grew to love Waldorf education even more.
