A Wondrous Journey Begins

For close to a century, Waldorf schools around the globe have been working to safeguard childhood.

In the Oakland Steiner School Parent and Child program, opportunities abound for a child's natural exploration of his or her surroundings in the presence of a parent, grandparent or caregiver.

Children will work side by side with the adult and under the guidance of our Waldorf teacher, to make nutritious snacks, paint, make simple crafts, learn songs, verses and stories, and do everyday household tasks. These simple activities nurture a child's sense of wonder and imagination, providing a content and secure connection to the world in which they live.

The classes give families an opportunity to gain helpful insights into the developing child from a Waldorf perspective through class discussion and handout materials and provide an introduction to life in a Waldorf preschool.
